

A FORCE FOR ORDER

A Division of Combined Systems, Inc.

Combined Systems, Inc (CSi), was founded in 1981 as a small engineering company specializing in pyrotechnic and munition systems for the U.S. Military. Today, CSi develops and manufactures a wide range of products from its Combined Tactical Systems (CTS) and Penn Arms manufacturing divisions.

Dedicated People Quality Processes Product Performance

CTS produces a wide range of less-lethal munitions for the military, police and corrections forces worldwide. Penn Arms, recently purchased by CSi, compliments this business with 12ga, 37mm and 40mm launching systems.

As a company with engineering roots, CSi has always actively pursued the development of new products made to the highest standards of quality and reliability

to ensure the most consistent and reliable performance in the market. CSi has been able to achieve and maintain these unmatched standards because the CSi employees understand the nature of your business and the simple fact that when a customer needs a CTS product, it is during a critical situation. Therefore, the product is **really needed** and reliability is paramount.

Research & Development

The CSi staff of experienced engineers and technicians continue to develop products meeting the demands of the soldier and police officer around the world. As a product development partner, CSi has earned the reputation as a company that delivers products that meet the operator's specific needs.

Quality Control Team

CSi ascribes to the highest standards of quality assurance. Our 9-person quality control team follows strict guidelines and

utilizes precision instruments to assure the highest standards of quality are met. This includes rigorous inspection and verification of incoming parts to standards that meet or exceed MIL-SPEC and in-process quality control monitoring during all critical manufacturing processes based on MIL-SPEC standards. Quality control includes in-process destructive performance testing and a 300% thorough final inspection process. CSi is ISO 9001:2000 certified and DOD 4145.26Mand MIL-STD 1916 compliant.

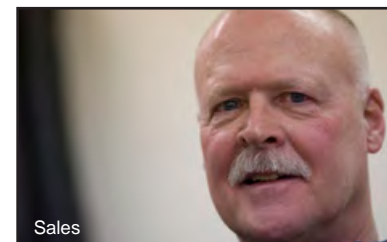

Sales & Training

The CSi sales staff is here to assist you, answer your questions and help you find the best solutions to meet your needs. The CTS training staff is dedicated to ensuring that CTS customers understand less-lethal products, allowing one to manage the risks appropriately and achieve the best possible outcome with CTS less-lethal munitions.

WARNING: Products manufactured by Combined Tactical Systems are less-lethal force options. Less-Lethal options are intended to cause varying degrees of pain and injury, which are temporary. These options are restricted to law enforcement, corrections and military personnel and are used to gain compliance, restore order or temporarily incapacitate dangerous persons. In rare circumstances, less-lethal options may cause death or serious bodily injury. Less-Lethal options may also cause damage to property. Therefore, any person using the force options pictured in this product catalog should receive proper training to ensure the safest and most effective use.

LESS-LETHAL INSTRUCTOR TRAINING

Combined Tactical Systems offers several comprehensive less-lethal instructor programs. The purpose of the training programs, is the certification of officers as less-lethal instructors. Upon successful completion, officers are equipped with knowledge and hands-on experience to return to their respective agencies and certify others in the safe and effective use of each less-lethal option. Find out more about the CTS Less-Lethal Instructor Training Program by contacting us at: (724) 932-2177 ext. 119 or e-mailing training@combinedsystems.com.

Aerosol projectors and accessories for patrol, tactical, crowd management and correctional officers. CTS Defense Aerosols are first options in spontaneous confrontations and non-compliant individuals encountered during patrol and correctional duty. CTS produces a variety of formulations, unit sizes and delivery methods.

OC Vapor System Model 1947HW

The OC Vapor System with hose and wand is ideal for forcing subjects from small rooms, attics, crawl spaces or confined areas in cell extraction situations. It is a non-flammable vapor which affects the respiratory system. OC Vapor does not require extensive area clean up or personal decontamination procedures.

OC STREAM EFFECTIVENESS

- Pain & discomfort.
- Primary effect is to the eyes.
- Mild inflammation and a sensation of sunburn to areas coming in direct contact with the OC liquid.

* MC refers the Major Capsaicinoids - the amount by weight of active OC ingredient in a can of pepper spray.

OC ACCESSORIES

HIGH VOLUME OUTPUT

Chemical Munitions & Smoke

CTS produces a full line of chemical irritant and smoke munitions. The comprehensive line includes grenades, 12gauge, 37mm and 40mm projectiles. These less-lethal options address a wide range of scenarios from assisting tactical teams in displacing or detecting barricaded subjects to aiding riot control units charged with maintaining order in public or correctional environments.

Indoor Grenade Solutions

Model 6240OCV - The OCV Grenade is non-flammable and discharges an invisible vapor into enclosed spaces effecting non-compliant subjects. The primary effect is shortness of breath, pain and discomfort.

Model 5230B - The Baffled Grenade can be used indoors with very minimal risk of fire. The 5230B delivers a very high volume of irritant agent. It is an excellent indoor option when the situation requires escalation of force.

Impact Munitions

CTS manufactures a wide range of single and multiple projectile munitions with payload capabilities exceeding those of any other less-lethal manufacturer. Single projectile offerings are extremely accurate for selective engagement in a variety of situations. Multiple projectile munitions come in a wide range of payloads permitting escalation of force when dispersing large and unruly crowds.

Point of Aim - Point of Impact Munitions

CTS offers point of aim - point of impact capabilities in 12ga, 37mm and 40mm calibers. Munitions such as Super-Sock® and Foam Baton provide the operator with extreme accuracy for selective engagement at extended ranges.

Flash-Bangs & Sting-Ball Grenades

CTS offers the widest selection of Flash-Bangs and Sting-Ball Grenades in the world with unmatched standards for safety and fuze consistency. Our systems can be deployed by hand or launched to extended ranges. Sting-Ball and Tear Ball Grenades come in a variety of configurations for multi-effect in riot situations occurring indoors or outdoors.

Model 7290T

Model 7290MT

Flash-Bang & Sting-Ball Training Systems

The 7290 and 7290M Flash-Bangs are quickly becoming the standard for SWAT teams everywhere. Sting-Ball Grenades are used everyday by correctional facilities to maintain order. Most importantly, CTS offers low cost training alternatives that enhance safety and saves your department money.

CONFIDENCE CLIP

CTS's patented "Pull Safe" hand grenade safety technology is incorporated on all CTS grenades and is currently being included on all US Army hand grenades as the "Confidence Clip."

PIN SHROUD

The Pin Shroud is incorporated on all CTS flash-bang grenades to prevent snagging of the pins on tactical gear, and to ensure consistency of pull force removing the pin.

FUZE PRECISION

At CTS, quality control staff, strict guidelines and precision instruments ensure every fuze is built to the highest standards for consistent delay times.
